***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-9, and 13, drawn to a chiral, peptide nucleic acid oligomer, method of making, and methods of introducing the monomers as claimed in a DNA sequence, and methods of using the oligomers for sequence specific recognition of a single or double stranded DNA, or RNA, classified in Class 536, 23.1, class 435, subclass 320.1, and class 514, subclass 44.

Group II. Claim 10, drawn to a method of diagnosis by using the oligomer of claim 1 or claim 2, classified in class 435, subclass 6.

Group III. Claims 10-12, drawn to a method of modulating the expression of genes in organisms, and treatment methods in the context of DNA applications of the claimed oligomers, classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

Groups I, II and III are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). The peptide nucleic acid of Group I is not limited for use in the treatment of diseases or modulation of gene expressions in any organism, and can be used *in vitro* and/or for diagnosis, wherein each of which methods generates different functions and effects, and is not required for use with each other.

Although there are no provisions under the section for "Relationship of Inventions" in MPEP 806.05 for inventive groups that are directed to different methods, restriction of inventions of Groups I, II and III are deemed to be proper because these methods appear to constitute patentably distinct inventions for the following reasons: inventions of Groups I-III comprise materially distinct steps and are directed to distinct goals and effects, wherein a distinct combination of methods steps are employed to produce a distinct combination of mechanisms and effects. Thus, the inventions of Groups I-III comprise

Art Unit: 1633

materially steps, and are not required for use with one another.

Should Group I, II or III be elected, the claims of the elected Group are generic to a plurality of disclosed patentably distinct species comprising:

A specifically named combination of the formula as recited in each of the claims 1, 2 and 5, wherein each of identifier must be elected for a specific species of compound or molecule.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species as listed above even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their divergent subject matter, fall into different statutory classes of invention, and are separately classified and searched, and/or because of the patentably distinct species as listed above, it would be unduly burdensome for the examiner to search and examine all of the subject matter being sought in the presently pending claims, and thus, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b)

and by the fee required under 37 C.F.R. § 1.17(h).
